DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: This invention deals with a cable comprising a first conductor located in a conduit having a nonlinear structure in which at least two segments of the first conductor are arranged as adjacent segments of the first conductor and conduct current in opposite physical directions such that a magnetic field in the first adjacent segment negates the magnetic field in the second adjacent segment (claims 1, 9, 10, and 18). This invention also deals with a method of reducing self inductance in a signal cable comprising the steps of arranging a conductor such that portions of the conductor are positioned in a non linear fashion such that segments of the conductor are adjacent to one another and arranged such that current in one of the segments moves in the opposite direction of the current in the adjacent segment such that the magnetic fields in adjacent segments negate each other (claim 19). The above stated claim limitations, in combination with other claim limitations, is not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

3. Applicant's arguments filed June 9, 2005 have been fully considered and they are persuasive. Specifically, the applicant's argument that "none of the cited prior art, alone or in combination, teach or suggest a first conductor located in a conduit having a nonlinear structure in which at least two segments of the first conductor are arranged as adjacent segments of the first conductor and conduct current in opposite physical directions such that a magnetic field in the first adjacent segment negates the magnetic field in the second adjacent segment", is persuasive and therefore claims 1-20 have been allowed.

Communication

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William H. Mayo III whose telephone number is (571)-272-1978. The examiner can normally be reached on M-F 8:30am-6:00 pm (alternate Fridays off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dean Reichard can be reached on (571) 272-2800 ext 31. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
